yes I got it I agree a quick phone call may be most efficient.

but my calendar is packed. I could try to catch you early tomorrow around 8, or at lunch from 12-1. weds around lunch as well but i'm free to 130.

how does your calendar look?

Hey Bert can you help me get more detail on what type of "input on the 402 permit requirements" you need?. I tried Karen Hamilton and got an email reply that she is out of the office.

We did have a coordination meeting with Karen and several others from EPA and certainly this is a very complex situation and our WQ segmentation is very unique in this circumstance. that meeting was meant to be and was just an informal discussion of the site.

Janet

Pat and I met with EPA R8 managers (Burt Garcia, Sadie Hoskie, and Art Palomares) yesterday for a meet and greet. Two items came up that needs your attention:

- 1) Climax Mine/McNulty Gulch wetlands determination. Burt asked for WQCD input on the 402 permit requirements based on the determination. Please draft a proposed response with a short briefing memo.
- 2) Permit backlog reduction plan. Sadie asked about the status of the plan. She acknowledged that you have been talking with Colleen. I told her that you have a draft plan started and that it needs internal review. I thought it might be ready by the end of February or early March. If this timetable will not work, let me know so I can tell Sadie. But in any event, we need to finalize it and send it over.

We can discuss more if needed.

Dick
